

**REMARKS**

The Examiner's courtesy in the telephone interview held March 31, 2011 is noted. In the interview the Examiner stated that he felt that the claims still needed added structure to define over Kuchel. In particular, the Examiner referenced Fig. 5 of Kuchel as showing first and second mutually orthogonally polarized beams of light spatially displaced from one another as required by Applicant's claims. As discussed at length in Amendment G and earlier Amendments, all incorporated by reference, it is believed that the Examiner's reliance on Kuchel, in particular Fig. 5, is not well based. Kuchel clearly shows, in Fig. 5, that the beams diverge as they pass from half wave plate 53c to Wollaston prism 50d. Notwithstanding, so as to better distinguish the claimed invention from Kuchel, Applicant's have amended independent claims 1, 29, 33 and 41 to add additional structure. No new matter has been entered. Support is found on page 12, lines 5-15 of Applicant's specification.

Applicant's attorney called the Examiner several times to discuss the foregoing Amendment, and has left numerous requests for telephone call back. The Examiner is respectfully requested to telephone Applicant's attorney to discuss any further Amendments that may be necessary to place this application in order for allowance.

Examination of the application and allowance of the application are respectfully requested.
